February 2012

To Our Valued Pharmacy Partner:

We would like to let you know that as of February 28, 2012 physicians and authorized prescribers at the Santa Barbara Health Care Center are now able to send electronic prescriptions to pharmacies.

This means that our physicians can send new prescriptions directly to the computers at ePrescribing-enabled pharmacies without faxing, phoning, or writing a paper prescription.

We are implementing ePrescribing in two phases. This is the first phase. Please continue to fax refill authorization requests to 681-5404. You will receive a similar notice when we are able to receive refill authorization requests electronically in the ePrescribing system.

Sincerely,

Dana B. Gamble
Health Center Administrator
(805) 681-5423
