The Public Health Department and Emergency Medical Services request that all long-term care facilities serving the City of Santa Maria attend this training.

Please join us for a workshop to:

**Prepare or improve your disaster plan:**
- How will you take care of your clients? Is your plan up to date?
- What will you do if you have to evacuate?

**Make sure your facility is on the county disaster maps:**
- Are you in the Vulnerable Population Database for disaster response?

**Coordinate with emergency providers and learn what assistance to expect:**
- Transport or 911: Is your staff ready to provide the right information when you call 911?

**WHEN:** March 21st, 9:00 am to 12:00 pm  
**WHERE:** City of Santa Maria Fire Training Room, 314 W. Cook St. #8  
**RSVP:** Santa Barbara Public Health Department:  
Jackie.robles@sbcphd.org or call 805-681-4913  
**BRING:** Your current disaster plan. We will also provide sample plans.

Disaster can strike quickly and without warning. It can force you to evacuate your neighborhood or confine you to your home or facility. How will you take care of your clients if basic services, such as water, gas electricity, or telephones are cut off?
