Charity Dean MD, MPH
Health Officer
Santa Barbara County Public Health Dept.

To Health Care Providers:

The patient to whom this letter was addressed has possibly been exposed to bloodborne pathogens during a medical procedure. The Santa Barbara County Public Health Department is recommending that this patient be tested for hepatitis C, hepatitis B, and HIV. The following tests are recommended for this patient, whose exposure was greater than ten months ago. Positive test results should be reported via CalREDIE. If you have questions, please visit our website at www.sbcphd.org call the information line at (805) 681-4373.

Laboratory Requisition Form - Recommended laboratory tests:

- HEP B SURF ANTIGEN
- HEP C ANTIBODY, TOTAL, with reflex to HCV RNA QUANT
- HIV antibody
