

## Abandoned / Neglected Citrus Reporting

The Asian Citrus Psyllid (ACP) has been confirmed to be present throughout Santa Barbara County. The insect carries the Huanglongbing disease, which is fatal to all citrus and has no known cure.

Unattended or abandoned trees can potentially infect commercial orchards, as well as your own backyard trees, with Huanglongbing. Please help us protect our citrus by completing and sending us the form below.

***Please tell us about the property you are reporting:***

**\*Required Fields**

**City\***

**Physical Location\*** *(If you do not know the exact address, please provide a detailed description of where the property is located using cross streets, prominent landmarks, geographical coordinates, etc.)*

**Approximate number of trees present or estimated acreage**

**General condition of the trees** (Dead, Abandoned, Overgrown with weeds, etc.)

**Please list any additional information relevant to this property**

***Please let us know who you are so that we can follow-up with any questions we may have about your submission.***
