Eugene S. Kellogg.

County Agricultural Commissioner

January 1, 1932

AGRICULTURAL CROP REPORT

1951

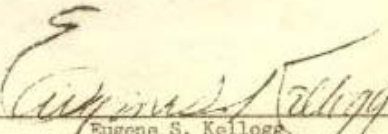

Santa Barbara County, California

Many requests are received at the County Agricultural Commissioner's office for figures dealing with the agricultural output of Santa Barbara County. These requests come from government agencies, Chambers of Commerce, transportation companies, banking institutions, farmers' co-operative organizations, marketing agencies and investigators from various institutions throughout the country. The figures found in this report have been secured from various agencies, including the several large warehouses of the county, the railroads and other common carriers, the various agricultural cooperative marketing associations, the University of California Extension Service, the Federal Agricultural Census, various farmers' organizations, packers, shippers and many individuals in close touch with the movement of agricultural commodities.

It is somewhat difficult to arrive at the production figures on many commodities, such as grain and alfalfa hay since a large tonnage remains on farms, but such of this appears in the form of animal industry products shipped later.

While this is a commodity production report, there is a very strong demand for valuation figures. Those shown here are on an f.o.b. basis, not what the farmer received. The figures given represent products sold, and in the case of animal industry should not be taken to mean a census of animals in the county.

The acreage of the county has been divided very roughly into three main districts: The Santa Maria, including Guadalupe, Casmalia, Orcutt, Los Alamos and Sisquoc; the Lompoc, including all of the Santa Ynez and Lompoc Valleys and the coast north of Gaviota; the Santa Barbara, including Carpinteria, Montecito, Goleta and the coast south of Gaviota. Allocation of production figures to each district in the case of Animal Industry is estimated. Acreage figures for field crops and vegetables are also estimated.

Eugene S. Kellogg
County Agricultural Commissioner

AGRICULTURAL CROP REPORT

1931

Santa Barbara County, California

Total Number Farms	1,408
Total Value Agricultural Products	\$13,016,523.
Total Acreage	1,683,200
Total Acreage U.S.Forest Reserve Area	754,380
Total Acreage Agricultural Area	775,191
Estimated Total Population	65,075
Estimated Total Population Outside Incorporated Cities	21,552
Estimated Value Petroleum Products	\$8,205,000.
Estimated Value Other Mineral Products	\$1,000,000.
Assessed Valuation (including operative property)	\$157,000,000.

Due to its geographic position Santa Barbara County represents a variety of climatic and soil types. From Point Concepcion, the great continental headland, the coast line runs north in one instance and south in the other, exposing approximately 100 miles of coast line.

Two main streams traverse the county from east to west: the Santa Maria River on the county's north boundary, and the Santa Ynez River to the south of the Santa Maria. These streams have laid down large deltas where vegetable growing and other intensive crops are grown.

On the south is a long, narrow coastal plain with a southern exposure where orchard crops and general farms are found. Citrus and semi-tropic fruits are grown in this area.

The islands off the coast are devoted to the production of livestock.

Approximately one half the area of the county is made up of United States Forest lands.
