Household pets (non-shelter)

Canine Vaccines:
1) **DAPP** (Distemper, Adenovirus, Parvovirus, Parainfluenza) Previously called DHPP
   - Administered at 6-8 weeks of age, booster every 3-4 weeks, until 16 weeks of age
   - IF > 16 weeks of age at first vaccine, booster in 3-4 weeks
   - Booster in 1 year and then every 3 years thereafter

2) **Bordetella bronchispetica + parainfluenza** (intranasal)
   - Administered once, as early as 8 weeks of age
   - Booster in 1 year and then every 1 year thereafter

3) **Rabies**
   - Administered at 16 weeks of age, booster in 1 year, then every 3 years thereafter

4) **Leptospirosis and Influenza vaccines** (at risk dogs only) **Not currently offered at our shelter- please follow up with your regular Veterinarian if interested**
   - Administer initial vaccine no earlier than 8 weeks of age, booster initial vaccine in 3-4 weeks
   - Booster in 1 year and then every 1 year thereafter

5) **According to the AAHA: administration of multiple doses of vaccines at the same appointment, particularly among small breed dogs (≤ 22 lbs.), may increase the risk of an acute-onset adverse reaction.**

Feline Vaccines:
1) **FVRCP** (Feline Viral Rhinotracheitis, Calicivirus, Panleukopenia)
   - Administered at 6-8 weeks of age, booster every 3-4 weeks, until 16 weeks of age
   - IF > 16 weeks of age, booster in 3-4 weeks
   - Booster in 1 year and then every 3 years thereafter

2) **Rabies**
   - Administered at 16 weeks of age, booster in 1 year, then every 3 years thereafter

3) **FeLV** **Not currently offered at our shelter- please follow up with your regular Veterinarian if interested**
   - Administer initial vaccine, no earlier than 8 weeks of age, booster initial vaccine in 3-4 weeks
   - Revaccinate annually for those at-risk cats
   - Test prior to vaccination / there is no benefit to give FeLV vaccine to an infected cat
   - All kittens, regardless of environment, should be tested and vaccinated

*Vaccines are not considered protective until 14 days after the last dose. It is not recommended to allow your pet into public places until 14 days post vaccination(s)*
