CORONAVIRUS DISEASE 2019 (COVID-19)
TESTING AND HOME CARE

TIER 1
Patients who are hospitalized or severely ill, regardless of age or comorbidities.
Symptomatic health care workers, including emergency medical services (EMS) and other first responders.
Symptomatic individuals residing in congregate living facilities (e.g. jails, shelters, long-term care facilities).

TIER 2
Symptomatic persons 60 and older with comorbidities, especially those with cardiovascular disease, diabetes mellitus, chronic respiratory disease, hypertension and cancer.

TIER 3
All other patients not included in Tier 1 and Tier 2 as testing capacity and supplies are available.
