2015
Regional Medical & Health Exercise
Final Tabletop
Today: Tabletop Purpose

- To prepare for the November 16-20, 2015 Medical and Health Disaster Exercise

- To Review:
  - Exercise schedule
  - Daily exercise activities for you

- To assure good communication
  - Between facilities/agencies and the warehouse
  - Between facilities/agencies and delivery drivers
  - Between facilities/agencies and the PHD DOC

- Provide us a last chance to discuss and clarify key communication and logistical assumptions in advance of the exercise.

2015 Medical and Health Disaster Exercise Scenario

ANTHRAX ATTACK!

Santa Barbara County Public Health Department

HOW ANTHRAX ATTACKS

Anthrax is a naturally occurring bacterium that plagues farm animals and, occasionally, agricultural workers. An airborne form of the disease, however, can be harnessed as a potent biological weapon.

1. Sneaking in Anthrax spores are inhaled and swept into the lungs.
2. Beating the defense White blood cells attack the spores, killing only a few.
3. Growing Spores collect in the lymph nodes and develop. The immune system of vaccinated people can defeat the infection at this point.
4. Striking Toxins released by the bacteria spread via the lymphatic system. The poison causes internal bleeding and severe damage to the tissue of major organs. Once the poison has circulated, antibiotics will not save the victim.

Source: "The World's Best Anatomical Charts"; "Zoology"; Anthrax Vaccine Immunization Program; Journal of the American Medical Association

ADRIAN HOLOVATY/Missourian®
You may be thinking....... 

Why Anthrax?
Anthrax Attacks 2001-
7 letters mailed in 4 states
Inhalation Anthrax

• Onset of symptoms:
  – 2 days up to 60 days post-exposure (may be 1 day)

• Antibiotics:
  – most effective before onset of symptoms
  – Mortality 90-95% without treatment

• LD$_{50}$ about 8000 spores
  – Infective dose probably less than 10 spores in susceptible persons
  – Gram positive, rod shaped, spore forming bacillus
The CDC and federal government have identified threats that could require immediate mass distribution of medications in our communities.

These include:

- Anthrax
- Smallpox
- Influenza
- Tularemia
- Plague
Pharmaceuticals from the Strategic National Stockpile
Plans to Provide Prophylaxis to the Public
Points of Dispensing=POD’s

“Closed” POD’s
Partner Program
Non-medical operation
- County Departments
- Private business or agency
- Distributes emergency medications
- Business operates a small POD for employees and their families
- Optional to serve clients or vendors

“Open” PUBLIC PODS
Non-Medical Operations
- Primary method of mass distribution
- Highly intensive staffing and logistics requirements
- Potential long lines and wait time for the public
What is your plan to provide mass prophylaxis to residents or staff?

Medical facilities
- Mass vaccination
- Mass distribution of oral antibiotics

Non-medical facilities/agencies
- Mass distribution of oral antibiotics
Regional Exercise Scenario

• **Thursday, 11/12**: Los Angeles: letter with white powder received at STAR Academy in Los Angeles County.

• **Friday, 11/13**: ER MD in LA reports potential anthrax in patient with group of small blisters that itch. Patient has a painless skin sore (ulcer) with a black center.
On Monday, November 16, 2015, **Biowatch** samples tested by Polymerase Chain Reaction (PCR) are positive (+) for *Bacillus anthracis* (the causing agent for anthrax) from the majority of Biowatch sites in Southern California.
So Cal Region 2015 Exercise Modules

Monday 11/16/15

Module 1: Region BAR (1000-1300)

Module 2: HO/MHOAC: Alert and SitRep Requesting MCM 1130-1430

Plans/Ops Strategy Meeting 12:00-1:30

Module 3: Regional Health Officer Decision Making PIO Activation (1500-1700)

Tuesday 11/17/15

Module 4: Regional Public Information and Risk Communications (0730 - 1000)

Module 6: State to Local Distribution (0800-1200)

Module 8: Prophy Receipt/Staging EOC, DOC, Warehouse (1000 – 1500)

Wednesday 11/18/15

Module 7: State to Local Distribution (0800-1200)

Module 8: Prophy Receipt/Staging EOC, DOC, Warehouse (1000 – 1500)

Thursday 11/19/15

Module 10: (0800-2000) EOC DOC Warehouse Truck Prophy Distribution Public PODs Goleta and Santa Maria Closed Business PODs (hospital, county departments, UCSB)

Friday 11/20/15

Module 11: Demobilization Return of Equipment Return of Prophy Exercise Materials to State Warehouse TBD and as needed: (0800 – 1700)

Open Public POD’s and Flu Vaccination Sites

Closed POD’s and Healthcare Partners
Free Flu Shots
Thursday, November 19th
3:00pm - 7:00pm

Goleta Valley Community Center
5679 Hollister Avenue, Goleta, CA

Santa Maria
Veterans’ Memorial Community Center
313 W. Tunnell Street, Santa Maria, CA

Protect yourself and your family this flu season.
Free flu vaccinations for all community members 9 years and older.
Checklists for Exercise Partners

Take a few minutes to:

• Review the right checklist for your type of agency or facility participation
• Ask questions in advance
• Use the checklist to guide your participation
• Return a copy of the completed checklist to the PHD/EMSA per instructions

Please briefly describe the current capacity of your facility to serve your patients:

How many patients is your facility currently serving on daily basis? _____
Can you accept additional patients? _____ If yes, how many immediately: _____ per day? ____
Can we refer appropriate patients to your facility during this disaster/event?  [ ] Yes  [ ] No
(Please indicate on the next page any resources you need to continue or increase your services.)

What types of care can you provide (include specialty services): _____

Are you providing care to disaster/event victims?  [ ] Yes  [ ] No
Approximate number: _____

Please describe any services you are providing related to the disaster or event: _____

Do you have patients in your facility that need a higher level of care?  [ ] Yes  [ ] No

What is the approximate wait time at your facility currently?
- [ ] Less than 30 mins
- [ ] 30 mins to 1 hour
- [ ] 1 hour to 2 hours
- [ ] 2 hours to 3 hours
- [ ] 4 hours or more
Status Reports from Hospitals: Reddinet Use in Exercise

• “This is a Drill” in all messages
• 0900-1100
  – “The 2015 medical health exercise has begun please answer the Reddinet polls.”
  – Hospital Command Center standard poll
  – Status poll for anthrax suspect patients, surge of worried well, decon, and mass prophylaxis status

• Reddinet messages with resource requests must be followed up with a written signed request.
• PHD DOC medical health branch staff will request a follow up resource request

Partner Communication

Healthcare Partners

Status reports, requests, and inventory reports go to either:

• EMS FAX or

• Outpatient Branch email
  
  DOCOpsCB@sbcphd.org

Hospitals and non-medical Closed POD’s

– Status reports from hospitals will be submitted via Reddinet

– Closed POD inventory reports AND

– Signed resource requests via email:

  – DOCOpsMB@sbcphd.org
Prophylaxis Delivery

1. Contact name on spreadsheet will be called
2. Must provide work/cell to assure contact can be called
3. Driver will require ID to confirm recipient
4. Recipient must inventory product
5. Sign chain of custody
6. Return shipment (either immediately or at a later pick up time in Santa Maria)
Healthcare Delivery Requirements

• Would your processes for delivery be different?
• Do you have a locked area where you would be able to securely store prophyl?
• Any other procedures that would need to be followed in a real event?
• Who will receive product at your facility?
What will I receive?

• Antibiotic Faux Bottles
• Pallet of either Cipro or Doxy OR
• Cases of Cipro and Doxy

• Candy prophy lolipops
What do I need to provide?

- Staffing to conduct the prophylaxis screening
- Location to conduct the screening
- Tables/chairs/pens or clipboards
- Copies of the screening form (English/Spanish)
- Copies of the algorithm
- Options:
  - Email both forms out to staff or residents in advance
# Practice Screening Form

The health department thanks you for helping us practice our screening skills!

List each person for whom you are picking up medication. Use one line for each person.

Choosing an Antibiotic: A Sample Algorithm

Your organization can use the following sample algorithm before or during an event to determine what antibiotic staff, family members and/or clients should get at a “Closed Point of Dispensing” in the unlikely event of a bioterrorism disaster such as an anthrax attack.

WHICH ANTIBIOTIC IS FOR ME?

START HERE

Are you allergic to doxycycline or any other tetracycline medicines? □ Yes □ No
Are you pregnant? □ Yes □ No

If you answered "Yes" to any question, you shouldn’t take doxycycline.
Now please answer all the questions below.

Are you allergic to ciprofloxacin or any other quinolone (“floxacin”) medicines? □ Yes □ No
Have you ever had seizures or epilepsy? □ Yes □ No
Do you take the medicine Zanaflex (tizanidine) now? □ Yes □ No

If you answered "No" to both questions
You’re Done!
You should take DOXYCYCLINE

If you answered “Yes” to any question, you shouldn’t take ciprofloxacin either.
You need to get MEDICAL CONSULTATION to find the right antibiotic for you.

If you answered “No” to all 3 questions
You’re Done!
You should take CIPROFLOXACIN
SCREENING CHILDREN

If a child or adult is allergic to Doxycyline and cannot swallow pills they must be sent to medical consultation.
In an Emergency: How to Prepare Doxycycline for Children and Adults Who Cannot Swallow Pills

Mixing Doxycycline Hyclate 100mg Tablets with Food

Once you have been notified by your federal, state or local authorities that you need to take doxycycline for a public health emergency, it may be necessary to prepare emergency doses of doxycycline for children and adults who cannot swallow pills.

June 2008
Prepared by the U.S. Food and Drug Administration

Supplies You Will Need
You will need these items to make doses of doxycycline for adults and children who cannot swallow pills:

- 1 doxycycline pill (100 mg) (Do not take doxycycline if you are allergic to tetracyclines)
- a metal teaspoon
- 2 small bowls
- Water
- one of these foods or drinks to hide the bitter taste of crushed doxycycline:
  - milk or chocolate milk
  - chocolate pudding
  - apple juice and sugar

Use any metal teaspoon to crush the pill
Use a MEASURING TEASPOON to measure the water. A measuring teaspoon = 5 mL (5 cc) of liquid

Crushing the Pill and Mixing with Water

1. Put 1 doxycycline pill in a small bowl.
2. Add 4 full teaspoons of water to the same bowl.
3. Let the pill soak in the water for 5 minutes so it will be soft.
4. Use the back of a metal teaspoon to crush the pill in the water. Crush the pill until no visible pieces remain.
5. Stir the pill and water so it is well mixed.

You have now made the Doxycycline and Water Mixture.
SCREENING EXAMPLES

1. Holly Lolipop Age: 2  allergic to Cipro cannot swallow pills
2. Jose Doxinon Age: 4 allergic to Doxy cannot swallow pills
3. Rose Klencher Age: 92 no allergies cannot swallow pills
4. Lilly Pensquno Age: 54 allergic to both Cipro and Doxy
Number of Courses Received=
How many bottles of faux antibiotics did you receive?
- 1 Case = 100 bottles
- 1 Pallet = 9,600 bottles

Number of Courses Dispensed
- Number of staff/residents that received Doxy or Cipro
Count the screening forms to fill in these numbers.

Communication

• We will be conducting video conferencing during the exercise to receive a status report from the hospital HCC, the warehouse, and PHD DOC.
• We have used video conferencing with your facilities in the past and that there have been some issues.
• We can now use Skype for Business which can make things easier.
• Is your facility willing to participate via video conferencing/Skype?
• If so who can our IT contact to discuss and test in advance of the exercise?
How do I know who to call?

– On your exercise checklist AND
  Exercise Phone Book
– Phone/Fax/email for All Agencies/Players
– Exercise Controllers Cell phones (hospital HCC and PHD DOC/Warehouse/EOC)
– Teleconference lines for Health Officer and PIO meetings
Public Information

Do’s and Don’ts

• Do NOT film outside of warehouse.
• Do communicate with PHD PIO if you plan to have press or media at your site.
  – Media has already begun publicizing mass vaccination flu clinics.
  – Media may want to film delivery to hospital sites. PIO’s should contact the PHD.
PHD Operations Center

Receive, Store, Stage “RSS” Warehouse

Closed POD’s and Healthcare Partners

Open Public POD’s and Flu Vaccination Sites
Free Flu Shots
Thursday, November 19th
3:00pm - 7:00pm

Goleta Valley Community Center
5679 Hollister Avenue, Goleta, CA

Santa Maria
Veterans’ Memorial Community Center
313 W. Tunnell Street, Santa Maria, CA

Protect yourself and your family this flu season.
Free flu vaccinations for all community members 9 years and older.
Media Discussion

• What media if any do you anticipate at your site?
• Provide your media contact.
Report Your Exercise Plan

- Hospitals
- Outpatient
- Long Term Care/SNF
- All others
Final Schedule

- Tuesday, 11/10, CAHAN test with poll
- Wed, 11/11, Direct Relief meeting
- Friday, 11/13, Final Exercise Teleconference,
  - final questions and clarification
- November 16-20 Exercise
After the Exercise!
Action Improvement Plans

• After Action Meeting
• Week of December 7-11\textsuperscript{th}
• Improvements and changes to plans
Thank You!

- We look forward to working with you November 16-20th
